CODA (cat. I)

CODA - Fabriqué à 90 % à partir de laine, Coda est tissé en deux couches, chacune dans une couleur différente : c'est la teinte de la couche de base qui est étonnamment révélée lorsque le spectateur s'approche du textile. Cette construction distinctive sert également à accentuer le caractère tridimensionnel du tissu et le motif rythmique de sa texture audacieuse. Textile très résistant et facilement nettoyable.

LAINE 90%, POLYAMIDE (NYLON) 10%

CODA - Made from 90% wool, Coda is woven in two layers, each in a different color. The color of the base layer is surprisingly revealed as the viewer gets closer to the textile. This distinctive construction also emphasizes the three-dimensional character of the fabric and the rhythmic pattern of its bold texture. Highly durable and easy to clean.

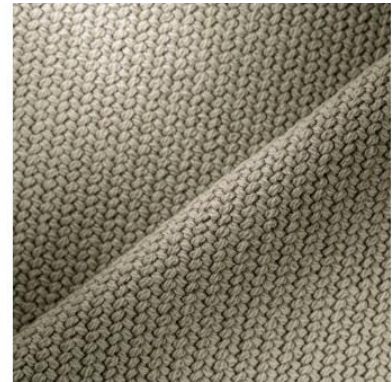

Material: 90% wool, 10% polyamide (nylon)
